SNT15-12VDC/30W

Switching power supply unit. Rated capacity 30 W. Standby loss 0.1 watt only.

Modular devices for DIN 60715 TH35 rail mounting.
2 modules = 36 mm wide, 58 mm deep.
At a load of more than 50% of the rated capacity and always if there are adjacent switching power supply units and if there are dimmers a ventilation clearance of 1/2 module must be maintained with the spacers DS12 on both sides.
Input voltage 230 V (-20% to +10%).
Efficiency 91%. Stabilised output voltage 12 V DC ±1%, low residual ripple. Short-circuit proof.
Overload and overtemperature protection through automatic shutdown. In the event of an overload, the output current is limited to 3 A, and the voltage drops accordingly. If the output voltage falls below 6 V or the temperature rises above the limit, the switching power supply shuts down and restarts automatically as soon as normal operating conditions are restored (autorecovery function).

SNT15-12VDC/30W	Switching power supply unit 12V DC	**Art. No. 20000167**	**31,98 €/pc.**
Optional: DS12	Spacer	**Art. No. 20000010**	**2,23 €/pc.**
