

FMS55SB

NEW

Wireless multi sensor pure white glossy for single mounting 80 x 80 x 14 mm or mounting in the 55 mm switch system. With integrated solar cell and battery CR 1632 (not included in the scope of supply). Smart Home Sensor.

This multi sensor comprises sensors for temperature, humidity, lighting, acceleration and magnetic contact all integrated in a single housing. It sends all data via EnOcean wireless to the Eltako Wireless Building system. The integrated solar cell generates the necessary power from ambient light in rooms. Power is then stored internally to allow the multi sensor to operate for several days without light. The multisensor has an NFC interface, which can be used to configure it with the free 'EnOcean Tool' app and an NFC-enabled smartphone or tablet.
In its as-delivered state, the EEP: D2-14-41 is enabled and contains the data of all sensors. The sensor parameters can be edited via the NFC interface and individual EEPs can be selected: D2-14-40, A5-04-01, A5-04-03, A5-02-05, A5-06-02, A5-06-03 or A5-14-05.
