DAT71

Data transformer to configure Series 71 actuators using the PCT14 PC tool.

The DAT71 can be used to link an actuator to the PC. Using PCT14, data can be transferred to or from the actuator. In addition the DAT71 can be used as a mobile data storage.
The DAT71 must then be plugged into the actuator and connected to the PC by USB cable (not included in the scope of supply).
After starting the PCT14, configure the actuator.

Plugging the data transformer DAT71 to a Series 71 actuator.

DAT71	Data transformer for Series 71	**Art. No. 30000026**	**83,53 €/pc.**
